Vishal Lad

Software Architect @ SLB | Building Human-Scale Solutions in an
AI-Hyped World | Full-Stack Developer with Deep Front-End Focus
Pune, Maharashtra, India

Summary

I write code, design architectures, and occasionally fix what I
broke yesterday.My stack includes Angular, React, Node.js, and
a rotating cast of cloud services that send me invoices I'd rather
not open. I build AI-powered systems that talk back (politely), scale
automatically (hopefully), and make life easier for humans (that's
the plan).I work hands-on with Generative AI, designing Retrieval-
Augmented Generation (RAG) pipelines, LangChain frameworks,
and vector database integrations that make applications smarter
and more conversational. Whether it's architecting cloud-native
microservices or tuning LLM-driven workflows, I enjoy bridging logic
with creativity — turning abstract ideas into working systems that
actually deliver value.With experience across front-end frameworks,
back-end services, and cloud platforms like AWS and Azure, I
thrive on building systems that scale gracefully and survive Friday
deployments.I'm powered by curiosity, Kubernetes, and music — not
necessarily in that order.Motto: If it works the first time, I don't trust
it.

Experience

SLB
6 years 6 months

Software Architect
September 2025 - Present (6 months)
Pune, Maharashtra, India

Software Architect | GenAI Solutions | Conversational Data Discovery |
Scalable Agent-Based Workflows | Enhancing Data Experience Across
Sources

Technical Lead
September 2019 - September 2025 (6 years 1 month)
Pune Area, India

Accenture
Technical Architect Associate Manager
August 2016 - September 2019 (3 years 2 months)
Pune Area, India

Tieto
Senior Technical Lead
October 2014 - August 2016 (1 year 11 months)

Worked as Lead Front-End developer for Large Nordic bank.

Accenture
Software Engineering Team Lead
May 2010 - October 2014 (4 years 6 months)
Pune Area, India

Working as a SME in a Client Architecture Team.

Providing solution for Web/Mobile application using Flex,HTML 5/Javascript,
PhoneGap.

Acted as Lead Developer/UI Architect for complex Single Page Applications
web/mobile. Provide solutions to AngularJS and BackoneJS based
applications.

Handling RFP/RPI

Grey Matter India Technologies - An Idhasoft Company
Flex Developer
February 2010 - April 2010 (3 months)

Worked as Flex Developer

ThoughFx
Software Engineer
September 2009 - January 2010 (5 months)

Working as a Flex Developer.And has an experience in
www.salesforce.com(CRM).

V2 Solutions
Programmer
July 2007 - August 2009 (2 years 2 months)

Worked on applications in Flex that were targeted mainly for Salesforce.com.

Has an experience of creating s-controls, triggers.

Worked with Apex query language of SFDC.
